

Katrina Martich is a speaker, trainer, and consultant, who helps organizations find holistic approaches to today's environmental challenges. To this task she brings over twenty years of practical experience as an environmental engineer in public and private sector positions. In addition to running her own environmental consulting company, Katrina has been an adjunct instructor for The University of Texas at Arlington and completed an internship with the Texas Interfaith Center for Public Policy. Katrina grounds her approach to environmental challenges in the justice tradition of the Abrahamic faiths, with a focus on personal and business practices that allow all people and life to thrive in this world.

Katrina has a degree in Agricultural Engineering from Auburn University and a Master of Engineering from the University of Texas at Arlington. In 2013, Auburn University's Department of Biosystems Engineering (formerly Agricultural Engineering) honored Katrina with its Outstanding Alumna Award. She is a consecrated deaconess by the Lutheran Diaconal Association, a licensed professional engineer in Texas and New Mexico, and a Certified Professional in Sediment and Erosion Control. Katrina lives in Fort Worth, Texas, with her husband and three rescued cats. In her spare time, she volunteers at an equitherapy facility and enjoys hiking, working in the yard, and watching birds.
